Penn eIRB System Update

Jessica L. Yoos, MA, M.Phil.Ed., CIP
Director, Human Research Protections

Previous Townhall Topics

▶ **eIRB System Improvements**

- Efficiency of submitting and planned integrations with other Penn systems
- Improved tracking of submissions and transparency around review

▶ **Data Migration Plan**

- What studies, data, and files will and will not be migrated from HSERA to eIRB

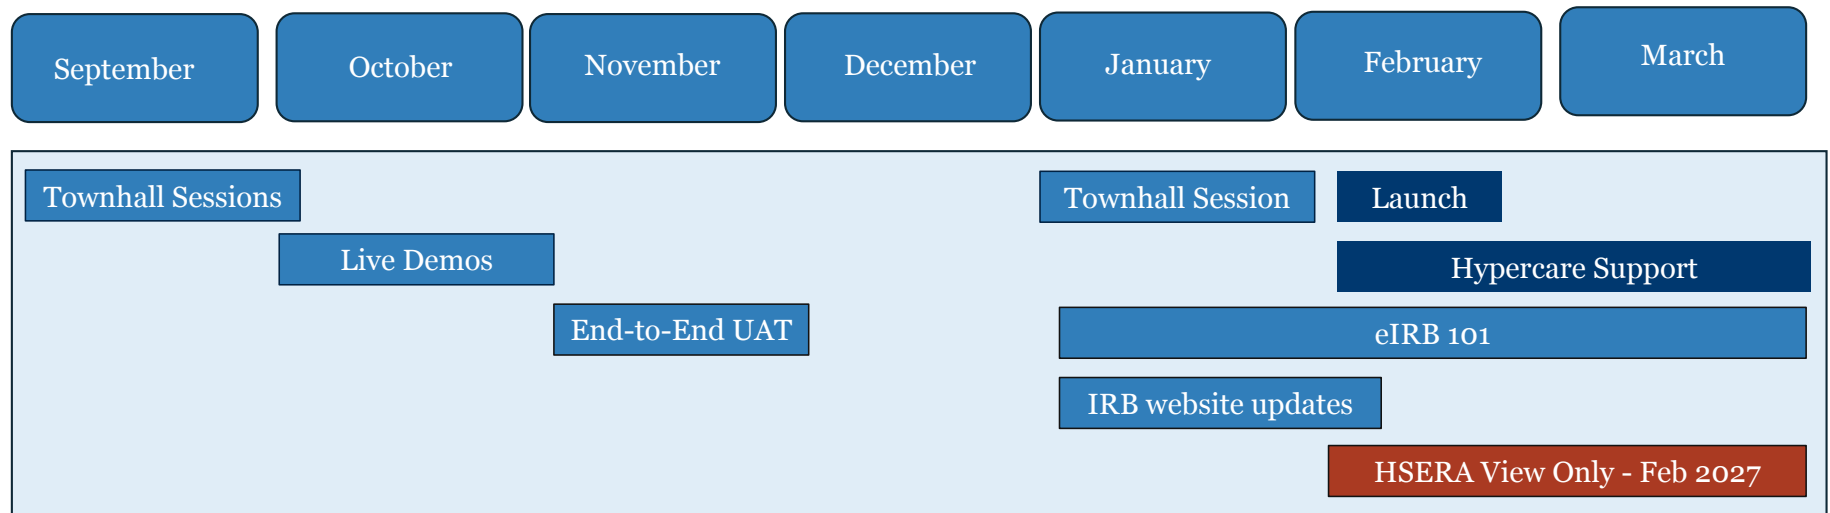

▶ **Policy Changes**

- New annual check-ins for studies not requiring continuing review
- Automatic study closures and post-closure study archiving

▶ **Necessary Migrated Protocol Quality Assurance**

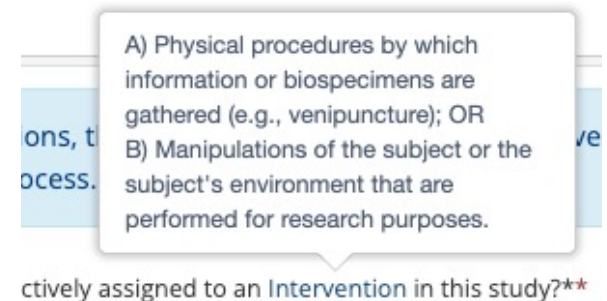

- Outlined what completeness quality assurance should take place during the first submission of a migrated study in eIRB.

Migrated Study Completeness

- ▶ **A walkthrough is under development and will be shared at eIRB launch.**
- ▶ The IRB asks that teams ensure completeness of their eIRB applications for migrated protocols *ideally* with their first planned amendment or continuing review + amendment submission in the new system.
 - If there are no planned submissions, the IRB is asking for completeness within 1 year of eIRB launch (by February 2027).
- ▶ This task must be completed via an amendment or continuing review + amendment submission. It may be combined with a planned amendment.
 - This task cannot be completed with a continuing review (CR), adverse event, deviation, or exception request, as the protocol application is locked. If you need to submit an AE, deviation, or exception – go ahead and submit them.
- ▶ IRB staff will screen for completeness.
 - After February 2027 a completion report will be generated; the IRB will reach out to teams that are not in compliance.

Migrated Study Completeness (cont.)

- ▶ **Paper Protocols** (protocols not in HSERA):
 - Must complete the whole eIRB application.
 - It is recommended that study teams assess their inventory of paper protocols to determine their own time and effort to conduct this activity.
- ▶ **HSERA Protocols:**
 - Only critical, mandatory fields must be completed.
 - NOTE: Validation is turned off to facilitate this process.
- ▶ **Protocols with a Submission Pending Review at the time of launch:**
 - Only critical, mandatory fields must be completed.

**Please disseminate this important
information to your colleagues, PIs,
Students, etc.!**
