

How to Find Uploaded Documents for IRB Review

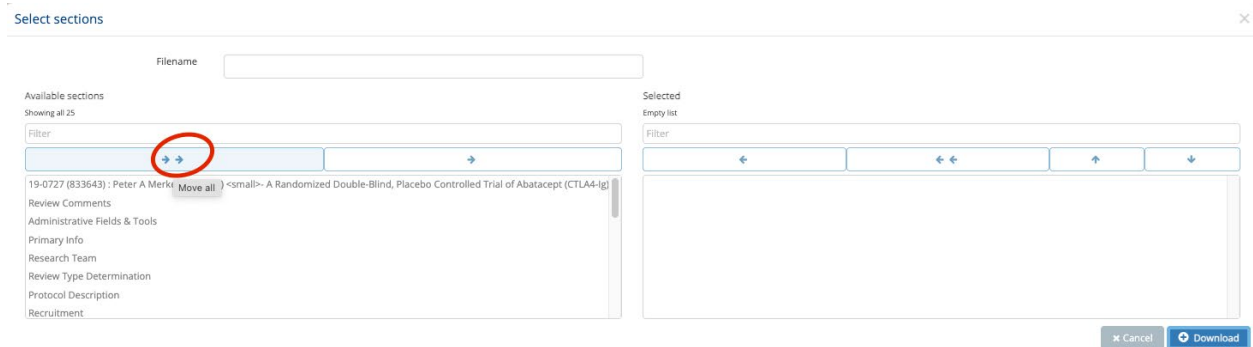

The documents are within various panels of the application. You may click through the various panels to locate the documents.

However, if there are many documents, it may be easier to download a PDF of the application.

To download a PDF, go to the top right corner – and click the cloud icon.

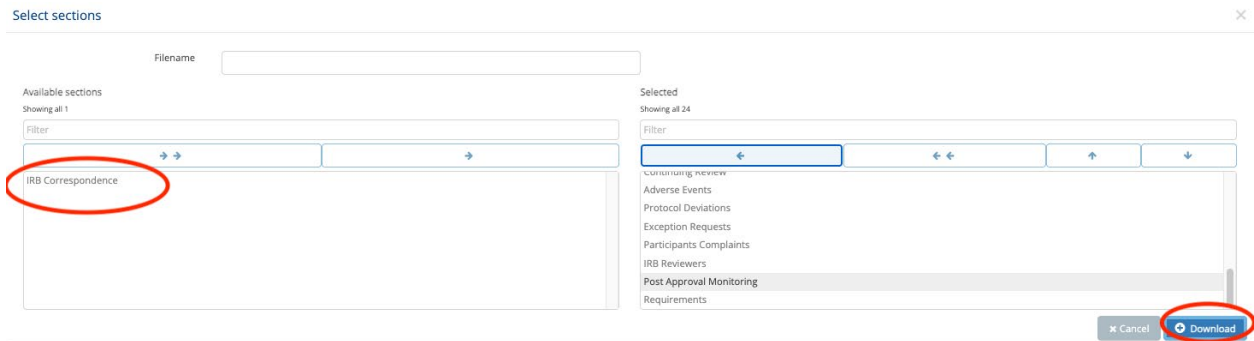

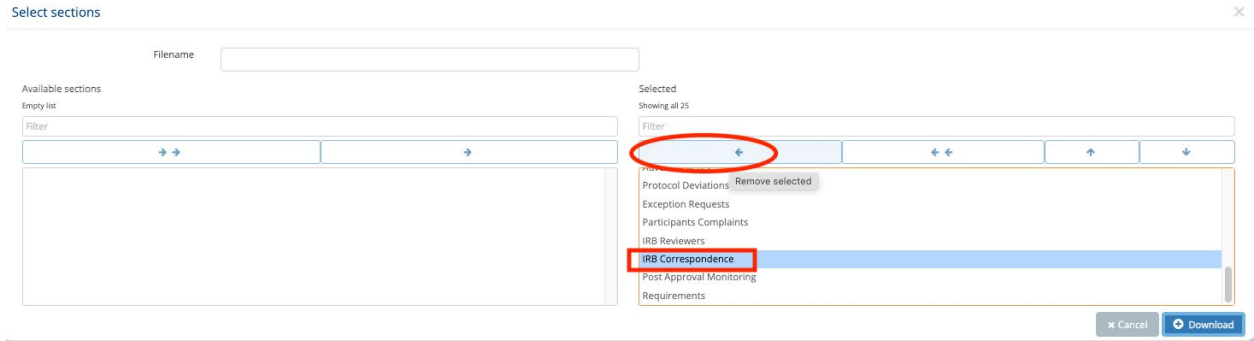

Select the double arrow to move all the panels into the PDF.

Move the IRB correspondence back to unselect it so that you do not download all of the IRB letters in the PDF.

Click download.

Open the document in Adobe and the documents should all be attached under the Attachments icon. **NOTE: This will not work in a browser window.**

You can select all of the attachments and save them elsewhere if you wish. You can also click each one to open it.
